The Adelanto MBYC work crew stayed plenty busy with crate construction for organizations at the Southern California Logistics Airport (SCLA) in Victorville. Custom crates and pallets were drafted from start to finish for various airplane parts, with Sr. Construction Trainer Gary MacKenzie leading this operation, and Construction Trainers Daniel Udell and Natasha Bravo, Trainer's Assistants Cameron Wade and Joseph Flaugher took charge of the project. Work crew members worked tirelessly through the sweltering heat to finish the crates on time for delivery.
