# every child's grief experience is individual and unique.

*MargaretAnn's Place creates opportunities for children and teens grieving the death of someone close to them to engage in peer discussions, organized activities and peer bonding. Children are able to develop lifelong coping skills and create a healthy and productive future for themselves, despite their tragedy. MargaretAnn's Place relies on the generous contributions of individuals, businesses, grants and fundraising events to provide support, education and outreach to over 500 children and family members each year.*
